

We believe in
the discovery
of the natural
environment
through the
fusion of
Art and Science.

Discovery and Appreciation
of the Natural World

Fusion of Art and Science

Our purpose is to create
images and events in which
the fusing of art and science
reveals previously unseen
beauty. Our goal is to instill a
sense of wonder and a desire
to discover, appreciate, and
provide long-term steward-
ship of the natural world.

WHO

Projects for a New Millennium was established in 1993 to create events and educational programming that fuse art, science, and the environment as a means of discovery and appreciation for the natural world. Teams of artists, scientists and environmentalists create collaborative events, exhibitions and educational programs offering unique and powerful visual and sensory experiences. Accompanying source materials invite audiences to continue the journey of knowledge and participation in the future of our planet.

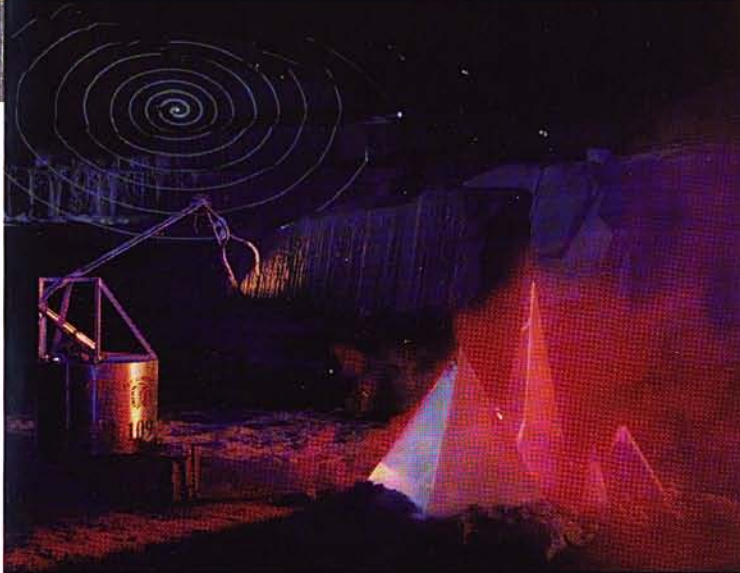

P2k explores the ancient and modern worlds in wildly creative ways, creating the most interesting environmental installations you will ever see.

—Faith Middleton
Connecticut Public Radio

Projects for a New Millennium has impressed and engaged me since my first association...I applaud their efforts to build new connections between art and science.

—Dava Sobel

Author of Longitude, Galileo's Daughter, & The Planets

Enhancing learning through
the fusing of art and science
as a means of discovery
and appreciation for
the natural world.

Our programs

transform audiences through
unconventional encounters with
the natural world revealing the
wonders of nature and our
responsibility for its care.

WHAT

Our programming focuses on individual responsibility for the health and welfare of the built and natural environments in which we live, and how local efforts extend to the world and to all peoples across the globe.

Projects2k represents the best in artist-driven cultural interventions into the public sphere.
